DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/16/03 has been entered.

NOT ENTERABLE AMENDMENTS

The abstract and amendment to the specification starting on page 5, line 4, could not be entered because of improper form to these amendments. The proper form is amendments indicating insertions and deletions rather than the final form. Also, the abstract must be supplied on its own separate sheet of paper.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1631

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 45-50, 52-55, 57, 58, 60, and 62-70 are rejected under 35 U.S.C. 102(e)(2) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Handique et al. (P/N 6,130,098).

This rejection is reiterated and maintained from the previous office action, mailed 1/13/03. Applicants argue that Handique et al. fails to disclose a valve in the device therein described by pointing to various Figures etc. in the reference. In response the valve disclosure was previously pointed to in the reference in column 10, lines 57-65, which was not argued by applicants. Applicants' arguments are therefore moot due to not being directed to the basis for the rejection on this claim limitation.

Claims 45-50, 52-55, 57, 58, 60, and 62-70 are rejected under 35 U.S.C. 103(a) as unpatentable over Handique et al. (P/N 6,130,098), taken in view of Wilding et al. (P/N 5,587,128), or, alternatively, Wilding et al. (P/N 5,587,128), taken in view of Handique et al. (P/N 6,130,098).

This rejection is reiterated and maintained from the previous office action, mailed 1/13/03. Applicants argue that neither Handique et al. or Wilding et al. disclose a valve in the device therein described by pointing to various Figures etc. In response the valve

Art Unit: 1631

disclosure was previously pointed to in the Handique et al. reference in column 10, lines 57-65, which was not argued by applicants. Applicants' arguments are therefore moot due to not being directed to the basis for the rejection on this claim limitation.

CLAIM OBJECTIONS

Claims 51, 59, 61, and 71 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703)308-4242 or (703)305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ardin Marschel, Ph.D., whose telephone number is (703)308-3894. The examiner can normally be reached on Monday-Friday from 8 A.M. to 4 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, Ph.D., can be reached on (703)308-4028.

Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instrument Examiner, Tina Plunkett, whose telephone number is (703)305-3524 or to the Technical Center receptionist whose telephone number is (703) 308-0196.
